## Distribution of spectacles

Each year Mission Paraguay collects over 1000 pairs of second hand spectacles in the UK to be distributed to needy people in areas of Asunción, Concepción and the Chaco region of Paraguay. Many people are unable to pay the cost of visiting a local optician and are fitted with suitable spectacles using the expertise of Mission Paraguay volunteers but other people can afford to have new lenses fitted in the frames supplied.

Women at Mirador, Asunción and at Concepción being supplied with spectacles

Nurse Beryl Baker who works amongst the Indian people living in the Chaco receives a supply of spectacles each year.

The project is organised through the Anglican Church in Paraguay which works in many of the poorest areas of Asunción, the capital; in Concepción a large town situated on the Rio Paraguay and amongst the Indian communities living in the Chaco which is the large expanse of scrubland in northwest Paraguay. These are some of the most marginalised people in Paraguay.
