

News from Dany and Flavía

Our experience in Ecuador

Thank you for your support and prayers during our time in Ecuador.

We could see God's hand in every detail.

Pintag

In this town we visited 2 schools. Each day we spent 2 hours with each year group. We spoke about our country's culture, played games and danced typical dances. We touched on a theme of Christian values and reflected on this with the students through various activities.

We were also supporting Pastor Alfredo Acosta in the three churches that he pastors. We led youth services as well as the Sunday services, also contributing to the preaching and supporting the Sunday School. We ran an event for children in Santa Teresa and one for young people in Pintag and Ubilus. The church in Pintag has a centre for Community Help and we were able to help with the children in the Nursery.

We also did evangelism in the town square and a club. Through presenting two sketches we were able to speak to them about Jesus.

Pitrishka

During the second stage of our trip our base was in Pitrishca (in the Amazon region) where there is a small church. We learnt a few important phrases in Shuar (the official language) as well as a few songs. We shared in the services. We helped improve the building and ran some Bible Studies for children and adults.

We were also able to visit several other communities nearby. In the community of San Antonio 12 adults and 25 children gave their lives to Jesus. The local Christians in Pitrishca committed themselves to continue visiting them. It was incredible to see the hunger there was to know more of God.

Santo Domingo

The church was very well organized and we helped out with the Holiday Bible Club. Around 60 children from the neighborhood came each day to share in games, songs and Bible teaching. We also shared about the Lord in two Christian radio programmes that are aired through a non-Christian sender. We visited a difficult neighborhood where the church is starting a church plant and did evangelism in the community club.

It was a big surprise when later we learned that one of the most dangerous people in the area, who sells drugs, was there and was watching and listening to what we had to share.
